

Separator belts
for product separation

Clean separation. Perfectly done. Discover the difference.

The Esband separator belts combine unique materials with many years of experience and know-how of Schlatterer. Due to the high quality they are perfect for applications in the food industry, especially for the separation process of meat, poultry, fish and vegetables as well as recycling.

Quite often, technical details in the production process make the difference and ensure success. Our belts make a significant contribution to this because of their flexibility, smooth running performance and long-lasting lifetime. The Schlatterer concept also includes the profound support of our customer-oriented service.

beef/poultry/pig

fruit/vegetables

fish

recycling

Our variants. Your choice.

Does your preparation process involve separating meat from bones, cartilage, tendons or feathers?
Does the separation equipment work with a roller drive or chain drive?
We can offer you different variants of our belts to suit your own particular requirements.

Tension members made of endless special fabric
